Math Flash Cards -- Netbook Version

Math Flash Cards Computer Record Sheet: A printable file for keeping records of your students' progress as they use the programs in Math Flash Cards.

Program Design:

- **Numbers Match:** A number is shown then the student is given three flash cards with dots on them. If the answer is incorrect, The "Show Me" and "Just the Answer" buttons appear. The "Show Me" button counts the dots as the Magic Bear says the numbers, then turns over the wrong cards. The "Just the Answer" just turns over the wrong cards, leaving the correct answer visible..
- **Learn the Facts:** The problem is given, and 4 different answers are shown on the line below. The responses to correct and incorrect answers are similar to the Number Match above. In addition there is a "Help" button which places "beads" near the problem and helps the student count them.
