Phonics Class -- Netbook Version

Phonics Class Program Design: With the voice imbedded in the program, you can determine whether your student is getting the correct answers by listening for the “rewards.”

The matching letters sections are excellent for helping very young children to manipulate the mouse.

In the Sounds sections, clicking on the “Help” button lets the student hear the names of the three words on the flash cards as the word is printed above the flash cards.

These features encourage independent learning.

Phonics Class Record Sheet: A printable file for keeping records of your student’s progress as they use the programs in Phonics Class .

Phonics Record Sheet: A printable file for keeping records of your students’ progress in learning sounds.
