

Botany Study - Flowers

Contents of the package:

This package consists of the four study units listed below. Detailed lesson plans are included in the first three study units. The last one follows the same pattern.

Page 1	Contents and general information
Pages 2 – 21	Parts of the Flower Study Unit
Pages 22 – 36	Parts of the Stamen Study Unit
Pages 37 – 51	Parts of the Pistil Study Unit
Pages 52 - 80	Types of Corollas Study Unit

- ✓ In addition to observing and describing actual flowers, a book on flowering plants and/or trees may be used to extend the students' knowledge of plants.
- ✓ The charts included in each study unit may be laminated or put in a sheet protector and taken on a nature walk to begin the observation with young students.
