

Botany Study - Leaves

Contents of the package:

This package consists of the five study units listed below. A detailed lesson plan is include in the Parts of the Leaf and the Leaf Shapes Study Units. The other three study units follow the same pattern.

Page 1	Contents and general information
Page 2	Leaf Description Lesson
Pages 3 – 22	Parts of the Leaf Study Unit
Pages 23 – 48	Leaf Shapes Study Unit
Pages 49 – 65	Leaf Margins Study Unit
Pages 66 – 81	Leaf Apexes Study Unit
Pages 82 – 97	Leaf Bases Study Unit

- ✓ The Leaf Description Lesson helps the student to put the observations s/he makes into interesting descriptive paragraphs.
- ✓ Describing a leaf in terms of its color, texture, shape, margins, apex and base trains students in the use of accurate and scientific terms in their writing.
- ✓ In addition to observing and describing actual leaves, a book on flowering plants and/or trees may be used to extend the knowledge of plants.
- ✓ The charts included in each study unit may be laminated or put in a sheet protector and taken on a nature walk to begin the observation with young students.
